A sparkling gift

by Rebecca Hastings

As a self-confessed jewellery addict, I'm super-happy that I can earn **8% Cashback** on **Swarovski** online purchases through **API website**, www.apilifestyle.com.au. I love **Swarovski** crystals - they're so sparkly that wearing just one instantly makes me feel glamorous.

The crystals have a fascinating history, too - in 1892, Daniel Swarovski invented a machine for making precision-cut, beautiful, high quality lead glass crystals using quartz, sand and minerals. The exact proportions of these raw materials has remained a company secret - so wearing them makes me feel as though I'm part of an exclusive club!

They have some gorgeous pieces in at the moment. At the top of my wish list is the Lisabel ring, a gorgeous gold-plated ring featuring a bumblebee motif encrusted with crystals. I'm also loving the Rainbow Paradise collection by Nathalie Colin, which is full of big statement pieces made with vibrant, brightly coloured jewels. I need a new watch, too, and I'm tempted by the designs in the Cosmic Rock range, which feature bangles coated in lavish silver or black crystals.

If you've got a friend's birthday coming up, why not treat them to some **Swarovski** sparkle? They'll never need to know that you **earned 8% Cashback** either! **API**
